

LCA PUSH POLES - 3/8" X 5' FIBERGLASS

QUALITY YOU CAN COUNT ON, INTEGRITY YOU CAN TRUST.

Lights Camera Action, LLC builds for quality and performance. A pole that does not fit snugly creates its own problems. We tried them and did not like them... so we decided to build our own poles. To begin we made the male insert 1 full inch in length. We tapered not only the edge of the male insert but we also tapered the inside of the female receptor. This allows the retractable spring loaded push pin to slide into place and lock by simply mating the two pieces together by hand.

A simple design creates a push pole that is easy to lock together and is solid. How will you use them? The three application listed are just suggestions. Call us to order your push poles!
