

LCA STAINLESS STEEL POLE SYSTEM

QUALITY YOU CAN COUNT ON...

LIFT BAIL MULTI-HANGER ASSEMBLY

PART NUMBER: LBMHA-01
WEIGHT: 3.5 LBS.

LBMHA-01: The Lift Bail Multi-Hanger assembly incorporates T-Bar, Rail Hook and Lift Bail into one unit. It attaches to a P-1.25-05 pole with a 3/8" x 2" SS Ball-Lok quick release pin. There is also a safety lanyard with a 3/16" Ball-Lok quick release pin.

Lights Camera Action, LLC didn't invent the pole system... we just made it better. We designed a new lift bail and multi-hanger lift bail system with quick release Ball-Lok pins that are part of the lift bail. The pole is a totally independent assembly.

We designed a coupling system that has the Ball-Lok quick release pins installed on the couplers rather than the poles.

A 12" Standoff was fabricated from 1" pipe to keep the lighthead from resting on the wall.

To facilitate storage and shipping, the poles are 5' in length. The poles are constructed of 1.25" diameter schedule 10 pipe. The thicker walls give more stability and sturdiness. All pole assemblies come with wire-way cutouts, pre-drilled lanyard holes and a coupler assembly.

Custom designs specific to your needs are available.

POLE ASSEMBLY

PART NUMBER: PA-1.25-05
WEIGHT: 8.2 LBS.

PA-1.25-05: The single pole assembly consists of a 5' length of 1.25" Sch. 10 pipe with wire-way cutouts and a 10" Coupler Assembly made from 1.5" Sch. 10 pipe. The Coupler Assembly comes complete with two 1/16" SS lanyards each with a 3/8" x 2" SS Ball-Lok quick release pin.
